PERSONAL PROJECTS

AirlineX (11/2022 - 01/2023)

- AirlineX- The Airline Reservation System is a comprehensive web application designed to facilitate efficient and convenient booking and management of flight reservations. The system aims to streamline the reservation process for both customers and airline staff, ensuring a seamless experience from ticket purchase to flight boarding.

Basic Desktop Assistant (04/2023 - 04/2023)

- The basic desktop assistant project is a simple implementation of a virtual assistant that performs various tasks based on voice commands. It is built using Python programming language and leverages existing libraries and APIs to provide functionality such as speech recognition.
